

日本熱帯農業学会第222回研究集会

SPECIAL LECTURE COURSE BY A VISITING RESEARCHER (Code: Y103000)

“Special Lecture on Global Issues in Agricultural Science 3” 国際農学論特論3

Climate-Resilient Horticultural Production

日時：2026年11月11日 13:15 ~ 16:30 W520

日本熱帯農業学会・京都大学農学研究科 合同開催 JSTA-KUGSA Joint

How is the climate change reshaping horticultural production, farmer livelihoods, and global food security? Audience will examine plant responses to climate stress and evaluate innovative solutions such as protected cultivation, PFAL, precision agriculture, IoT, and data-driven environmental control. Through interdisciplinary case studies, the course integrates scientific, economic, social, and sustainability perspectives to develop practical climate-resilient strategies for future food systems towards “**the sustainable horticulture innovative roadmap**”.

講演者: **Dr. Watcharra Chintakovid** (Agricultural Science & Food Resources and Ecosystem Sustainability, Mahidol University, Thailand)

会場：京都大学農学研究科（北部キャンパス）
